FOR 2026

Who are we trying to reach?

B2B Marketing

WebMD Health Services

Agenda

1. **Definitions**
2. **Market Segments & Ideal Client Profiles (ICPs)**
   - Enterprise Large/Jumbo (10k+)
     - Enterprise Medium (5-10k)
     - Health Systems
   - Mid-Market (1-5k)
   - Public Sector/Education
   - Health Plans (National, Blues, Regional)
   - TINYpulse
3. **Target Audiences & Buyer Personas**

WebMD HealthServices

Definitions & Hierarchy

Market Segment SF Dashboard

1. *All Accounts by Type, Size, Industry*
2. *Enterprise Accounts by Industry, Size*
3. *Health Plan Accounts by Industry, Size*
4. *Public Sector/Education Accounts by Industry, Size*
5. *Mid-Market Accounts by Industry*
6. *Opportunities by Segment*

Market Segments

Example: Enterprise

A subset of potential clients with shared traits or needs, allowing businesses to customize marketing & sales strategies for maximum effectiveness.

Ideal Client Profile (ICP)

Example: Apple

Best-fit companies that are most likely to buy and succeed with you.

Target Audience

Example: HR/Benefits Buyer

Broad segment of companies + roles you market to.

Buyer Persona

Example: Sara H, VP of Benefits

The specific people within those companies and what makes them tick.

WebMD Health Services

Market Segments:
+ *Ideal Client Profiles (ICPs)*

Segment | Enterprise

Definition

A corporation with a diverse and expansive workforce looking to implement or replace a cohesive, company-wide well-being program.

Basics

Company Size: 5,000+ employees
Industry: Technology, Manufacturing, Financial Services
Revenue: $5 billion+
Employee Demo: Diverse workforce with various roles (executive, managerial, and entry-level), spanning multiple regions. Employees range in age, ethnicity, and well-being interests.
Well-Being Goals: Foster a culture of well-being globally, reduce healthcare costs, and increase employee productivity and retention.
Sphere of Influence: Consultants are always involved, and they come to the table with their favorites already in mind.

Pain Points

Employee Engagement: Low engagement rates in existing well-being initiatives due to a lack of localized and relevant content.
ROI Measurement: Difficulty in measuring the ROI of well-being programs across a geographically diverse workforce.
Cost: Best offer at lowest cost. Need to be aware of costs/economic concerns.

Key Needs:

Customizability: Requires a flexible solution that can be tailored to meet the unique needs of employees in different locations and roles.
Scalability: Needs a platform that can seamlessly scale across multiple locations and support diverse cultural norms and health requirements.
Strategic Guidance: Require a lot of help/support here, want us to tell them how to run their program.
Resourcing/Account support: Long-term stickiness, support with their account

Desired Outcomes:

Engagement: Achieve higher participation rates across all regions by providing relevant, localized well-being content.
Impact/ROI: Demonstrate measurable improvements in employee health, well-being, and productivity globally.

*Enterprise Market Segment also includes Enterprise Jumbo (10k+ employees), Enterprise Medium (5-10k employees) & Health **Systems**

Segment | Mid-Market

Basics

Company Size: 1,000 - 5,000 employees

Roles/Titles

Same as Enterprise (HR/Benefits Buyer)
- Director, Manager, Coordinator
- C-Suite titles are more available to talk to due to the smaller org structure

Sphere of Influence

Consultants are often involved
- Smaller consultant houses outside of "the Big 5" (i.e. USI, MMA, HUB)

Concerns/Areas of Interest:

Very cost-conscious
- Not as amenable to upsells

Cares about:
- platform engagement/registration/utilization, and challenge capabilities to drive this
- one-stop shop platform/solution
- straightforward user experience
- coaching
- Weight loss programming (Positively Me, Diabetes, Hypertension)
- Creative Shop for comms only

Doesn't care about:
- ROI seems less relevant *(at least at the moment)*

Other:

- They already have a solution, but likely a point solution not a comprehensive, one-stop shop

***Stakeholder(s):** Jack Flowers, BDR

Segment | Public Sector/Education

Definition

Public Sector: Governmental and publicly funded organizations such as national, regional, and local government departments, public agencies and authorities (e.g., health services, transport authorities, emergency services), state-owned enterprises and public utilities
Education: Institutions and organizations involved in teaching, training, and academic research such as public and private schools, Colleges and universities, Training providers and online learning platforms, Educational boards and ministries of education
Biggest differences between Public Sector & Education seem to lie in the Sales/Contracting process. Public sector is much more regulated and formal.

Buyer Roles/Titles

Similar to Enterprise, but as a dedicated role/function

- **Dedicated wellness advocate** responsible for securing budget and driving wellness initiatives.
- **Well-being Director of HR,** with wide variety of experience.
- The Board holds final approval authority.

Sphere of Influence

- **No consultants** typically involved
- **BDR outreach, conferences**/sanctioned events where familiarity and trust are built helps with name recognition, though direct engagement is limited outside *sanctioned* settings
- **Brand Reputation-driven:** Strongly influenced by feedback from other public entities and peers.
- *Public Sector - Extensive oversight and internal buy-in involved*

Concerns/Areas of Interest

- Low utilization, engagement, custom reporting needs
- *Education – Limited time at desks, Summer periods*

Public Sector –

- *ROI is #1 priority, help to justify spend to boards/taxpayers - our competitors (Personify, Sharecare) do this*
- *Client Stories - no confidentiality concerns with gov't clients*

Contracting

Public Sector Contracting process is highly formal, rule-bound, strict RFX req, & long (~2 year) timelines. **Education is somewhat more flexible**

- *Public Sector - Need awareness of political leanings (red vs. blue city/state) before engagement. Clients may audit vendor content and websites for compliance with local norms*

Many clients previously partnered with health plans (lower cost option).

- We're seen as a standalone vendor versus bundled health plan solutions.

WebMD Health Services

***Stakeholder(s):** Emily Rosetter, CS; Nate Cavender, Sales

Segment | Health Plan

Definition

A type of insurance company that provides coverage for medical and healthcare services; designed to help individuals pay for healthcare expenses. *Think: National/Blues/Regional*

Characteristics

Company Size: Varies
Industry: Health Insurance; Healthcare
Revenue: Varies
Employee Demo: Predominantly C-Suite, Directors, Managers and/or Procurement representatives.
Well-Being Goals: Attract and retain employer clients. Control healthcare costs (reduce claims). Provide tools and incentives that promote preventive care, increase member engagement, and collect valuable data.

Pain Points

Integration with Existing Systems: Difficulties in integrating new well-being programs with existing healthcare and benefits management systems.
ROI Measurement: Need to prove the value of well-being programs to justify continued investment.

Key Needs:

Driving Membership Growth While Optimizing Plan Utilization: Focused on bringing in new member groups and minimizing utilization of plan services so they can reduce claims.
Customizability: Requires a well-being program that accommodates varying schedules, shifts, and high-stress roles.
Addressing Social Determinants of Health: Well-being is heavily influenced by non-medical factors like economic stability, food security, and housing. Health plans face numerous challenges in addressing these complex issues

Desired Outcomes:

Provide programs that are attractive to their member group decision makers. We can at base be a "check the box" item for a member group and at best be an additional selling/decision/value point that attracts new member groups to contract with the health plan.

***Stakeholder(s):** Abigail Wright, CS; Peter Zambrano, Sales

Segment | TINYpulse

Definition

HR People leaders tasked with improving employee engagement, measuring sentiment, and building a positive workplace culture. They sit at the intersection of data-driven strategy and people-first leadership.

Characteristics

Company Size: 500-5K Employees
Industry: Tech/SaaS, Professional Services, Healthcare, Financial Services, Education
Revenue: $30M-$1B
Employee Demo: Mix of office, hybrid and remote workers, Millennials-Gen X, including non-desk and frontline workers.

Pain Points

1. Low or inconsistent engagement
2. Retention challenges
3. Data overload but no clear steps to take action
4. Disconnected/distributed teams
5. Leadership buy-in issues
6. Employee survey fatigue with no clear measures that lead to change

Key Needs:

1. Pulse feedback that's easy and engaging.
2. Actionable insights with clear and digestible data.
3. Recognition tools that foster positivity, trust, and alignment with company values.
4. Anonymity and trust that ensures honest employee feedback.
5. Integration with existing tools – seamless syncing.
6. Executive reporting that includes dashboards that demonstrate culture impact and ROI without adding administrative burden.

Desired Outcomes:

Engagement: Employees feel heard, recognized and valued. Teams regularly share feedback that drives organizational change. Managers feel empowered with data and confident

Impact: Increased retention and reduced turnover. Higher eNPS and improved culture scores. Stronger alignment between employee experience and company goals. Executives see direct correlations between engagement scores and business performance.

WebMD Health Services

Target Audiences

+ *Buyer Personas*

Target Audience #1 | HR & Benefits Buyer

Stakeholder Group	Role	Key Concerns	Titles
HR Directors and Managers	Oversee overall employee well-being and benefits strategy. Responsible for choosing and managing well-being programs that align with organizational goals.	Employee engagement, retention, productivity, and overall well-being. They seek programs that are comprehensive, customizable, and able to demonstrate ROI.	• Director of Benefits • HR Manager • Director of CSR (Corporate Social Responsibility)
Benefits Coordinators & Managers	Directly manage employee benefits packages, including health and well-being programs. Act as the primary point of contact for well-being vendors	Cost-effectiveness, program flexibility, ease of administration, and employee participation rates. They prioritize well-being solutions that integrate seamlessly with existing benefits platforms.	• Benefits Coordinator
CHROs	Senior executives responsible for defining and executing human resources strategies, including well-being, health benefits and employee engagement programs.	Aligning well-being initiatives with broader corporate strategies, fostering a positive workplace culture, and demonstrating the financial impact of well-being programs on the organization.	• VP of HR
Well-Being Program Administrators	Directly implement and manage the day-to-day aspects of employee well-being programs. Evaluate the performance and effectiveness of well-being initiatives.	Ensuring program adoption and engagement, managing logistics, and gathering feedback from employees to refine the program.	• Director of Employee Well-being • Wellness Program Administrator
Employee Engagement Specialists	Focus on improving employee experience and engagement through initiatives like well-being programs.	Building a sense of community and belonging, increasing participation in well-being activities, and creating a positive organizational culture.	• Employee Engagement Manager
Corporate Executives (CEOs, COOs, CFOs)	High-level decision-makers who approve or veto large-scale investments in employee well-being.	Cost savings, improving productivity, reducing healthcare costs, and enhancing company reputation and employee retention.	• Chief Wellness Officer • Chief People Officer • Health & Safety Officer
Procurement Teams	Responsible for sourcing and purchasing services, including well-being programs. They negotiate contracts and assess the value of different vendor options.	Ensuring that the selected well-being program offers the best value, meets the organization's needs, and aligns with procurement policies.	N/a

Target Audience #2 | Employees & End Users

Stakeholder Group	Role	Key Concerns	Titles
Employees & End Users	Employees are the end-users of well-being programs, directly engaging with the health, well-being, and engagement resources provided by their employers. They are the primary beneficiaries of the services offered by WebMD Health Services (WHS), and their participation directly impacts the success of any well-being initiative.	Employees seek programs that are accessible, engaging, and tailored to their personal health and well-being needs. They value resources that are easy to use, provide real-time feedback, and support their mental, physical, and financial health goals. Accessibility on mobile devices, ease of navigation, and content relevance are critical factors for high engagement.	• n/a

Why are they important?

Although employees are a secondary audience, they are the most important group to consider in communications with primary decision-makers like HR directors and benefits managers. The effectiveness of the well-being program hinges on employee engagement and satisfaction, making it crucial for WHS to position its offerings as user-centric and empowering. Highlighting the impact on employees in discussions with HR, program administrators, benefits coordinators etc. helps illustrate program value, driving decision-makers to choose WHS as their well-being partner.

Target Audience #3 | Consultants pt. 1

Consultant/Broker Types	Description
Brokerage firms	Not used much in our world. Focused on smaller employers and tend to make money on volume of policies sold, combined with renewal commissions. Brokers are compensated on each product via commissions.
Consulting firms	Our target! Focused on larger employer groups and provide analysis and consulting for their entire business operation as a whole.
Employee Benefit (EB) Consultant	Sometimes just called "Benefits Consultant". A professional who works directly with that firm's clients regarding all aspects of benefit plan design and strategy including (but not limited to) medical, dental, vision, EAP and voluntary benefits offerings. Needs information and assistance in choosing the right vendor and solutions for their clients' needs. Consultants are generally compensated on a project basis but not always.
P&C Consultants	Not our target. Works with property and casualty vendors, strategy on assessing and mitigating risks.

Target Audience #3 | Consultants pt. 2

Stakeholder Group	Role	Key Concerns
Health & Well-Being Consultant (SME)	This is a SME (subject matter expert) in population health solutions and strategies. They assist and guide the EB Consultant and Account Executives / Account Manager by providing expertise around health and well-being solutions, design, evaluation and recommendation of vendors providing such solutions. *Title specifics on next slide.*	Cares about our strengths vs. our competitors (not a differentiator), why we are different and can we prove it. We want to understand their incentives, they want to know our numbers/ROI, etc. They want us to be their resource to help them be more successful at their job. **What they like:** WB Trends, Roadmaps, Innovation, Case Studies, Whitepapers, How to budget for WB program, tips for supporting client on menopause, etc.
Account Executive (AE) / Account Manager	Day to day contact person for the client. Highly involved in all benefit vendor discussions and managing the vendor relationships for their clients. We work with these the most, especially after the sale.	Not concerned specifically with any one vendor, as they manage all Health & Benefits vendors for their client (think: Dental, Pet, etc.). Not concerned with the "weeds".
Producer	These are sales folks looking for clients to utilized their firm's offerings so that firm can become the client's BOR (Broker of Record). Usually have titles of Vice President or Senior VP. Focused on finding new business. Not typically involved after the sale or in benefit vendor discussions.	End goal is for their client to enlist their Consultant firm for solutions. Not as concerned or engaged with the specifics.
Analyst	Works closely with the SME and AE. Crunches numbers and asks a lot of "ROI", analytics and pricing questions.	Concerned with numbers only. Not worth targeting but shouldn't write them off as they often move up.

Target Audience #3 | Consultants pt. 3

Consultant House and their respective Wellness Teams (SMEs) by Name:

- **Alliant -** Health & Productivity
- **Aon -** Health Transformation Team (HTT)
- **Brown & Brown -** Population Health (& Wellbeing)
- **Gallagher -** Well-being & Engagement
- **HUB -** Health & Performance
- **Lockton -** Precision Health (Formerly Health Risk Solutions)
- **McGriff -** Health Management (Health & Performance) Many other titles
- **Mercer -** MercerWELL (Formerly Total Health Management)
- **Marsh McLennan Agency (MMA) -** Health Management Consultants (HMC's). Many other legacy titles: Health & Productivity, Population Health, Total Health & Wellbeing)
- **NFP -** Vitality & Wellbeing Solutions
- **OneDigital -** Engagement & Well-being (Wellbeing Practice)
- **USI -** Population Health Management
- **Willis Towers Watson (WTW) -** Health Equity & Wellbeing (HEW)

Target Audience #3 | Consultants

General Guidance

- No aversion to filling out a form, more info to digest on their own time; On-demand webinars; no time during the day, like to ingest on own time.
- Nurturing existing consultants, vs. Generating new
    - Consultants move firms a lot.
- Consider a Well-being team member checkbox
- No need to update existing collateral to “speak” to Consultant
- Revisit Consultant Toolkit?
- Adding Consultant Page on the website

Target Audience #4 | Health Plan Buyers

Stakeholder Group	Role	Key Concerns	Titles
Procurement	Responsible for external sourcing and vetting of new vendors (RFP).	• Demonstrated ROI. • Customization and flexibility. • High engagement potential. • Integrated solutions. • Accreditation and expertise.	• Director of Procurement/Strategic Sourcing • Strategic Sourcing Manager • eBusiness Vendor Relationship Manager
Sales/Account Team	Selling the health plan to employer clients - Highly influential decision makers are sales and account management leaders. They are vocal about what their clients are asking for. The bulk of the HP revenue are coming from the sales.	The commercial (employer) groups are putting pressure on the health plans to bring something **innovative** to the market.	• President & CEO National Accounts • VP or Director, E-Business Development • Sales Strategy & Performance Lead
Innovation Officer	A senior executive responsible for driving strategy and managing all aspects of innovation across the organization. This role is vital for keeping health plans competitive and adapting to the evolving landscape of healthcare technology, customer demands, and regulations	Considered the "best buyer" because they are being pushed to do things differently or the regional plan will be acquired. Regional plans are struggling; they have a whole team dedicated to **innovation**.	• Chief Technology Innovation Officer • Chief Strategy and Innovation Officer • Senior Vice President of Strategy and Innovation • VP Product • VP Marketing • Director of Strategy and Innovation • Innovation Lead • Head of Innovation
IT Department	Influencers in the process. They are brought into commercial (employer) sales at the end and because they understand what the employer clients want. Can be the most dangerous person in the room as their available resources can kill a deal. These people have veto power.	• Tech forward and innovation. • Data handling and security controls. • Integration challenges, API and data standards. • Selling them on ease of implementation and possible phased rollout/flexibility is key to getting them on our side.	• Chief Technology Officer • Solution Architect • Managing Director, Inter-Plan Operations

Target Audience #5 | TINYpulse Buyers

Stakeholder Group	Role	Key Concerns	Titles	Core Message
HR / People Ops / Employee Experience	• Owns the employee engagement strategy and HR tech stack. • Leads vendor eval and rollout.	• Declining engagement, morale, or eNPS • Retention and voluntary turnover • Turning engagement data into actions • Proving ROI of 'culture' intitatives	Chief People Officer (CPO), VP of People and Culture, Director of HR, Head of Employee Experience, People Ops Director	"Turn employee feedback into real action that improves retention and culture."
C-Suite / Business Leadership	• Budget holder or final approver • Influences strategic priorities • Looks for alignment with business outcomes	• Retention of top talent • Productivity and performance impacts • Cost of attrition • Company culture and reputational risk	CEO, COO, CFO, President, Vice President	"Engagement insights that connect directly to business performance and growth."
Frontline & Mid-Level Managers	• End users and internal advocates • Influence adoption and long-term success • Translates insights into action at the team level	• Understanding how their teams really feel • Getting actionable guidance, not just data • Addressing burnout, morale, and performance issues • Managing teams (remote and onsite) effectively • Avoiding add'l admin burnout	Team Lead, Customer Success Manager, Department Manager, Ops Manager	"Simple, actionable feedback that helps you lead a stronger, more engaged team."
Tech Influencers: HRIS, IT, Operations	• Technical evaluator and gatekeepers • Reviews security, integrations, and scalability • Supports implementation and maintenance	• Data security and compliance • Integration with HRIS, Slack, Teams, SSO, etc. • System reliability and ease of administration • Clean data for reporting and analytics	HR Systems Manager, People Analytics Manager, IT Director, HR Ops Manager, Business Systems Admin	"Secure, easy-to-integrate software that fits your existing stack."

Target Audience #6 | Public Sector/Education

Stakeholder Group	Role	Key Concerns	Titles
Benefits, Total Rewards & Compensation	Owns benefits, compensation and total rewards strategy, design and vendor oversight	Cost containment and trend management, plan competitiveness and equity, vendor performance and accountability. regulatory compliance, employee satisfaction and utilization	• Director/Manager of Benefits • Director/Manager of Compensation
Wellness/Well-Being Program Management	Executes day-to-day benefits admin & programs	Ease of use, employee adoption and engagement	• Wellness Coordinator/Specialist • Well-Being Officer • Director of Health & Wellness • Chief Medical Director/Officer
HR Leadership	Manages workforce programs, policies, employee experience and people operations	Employee engagement and retention, policy compliance and consistency, HR system usability and integration, cross-functional coordination, change management	• Director of HR • HR Manager, Benefits & Wellness
Procurement, Contracts & Purchasing	Manages sourcing, contracting and vendor negotiations for benefits and wellness services. Often considered the "gatekeepers".	Cost savings and contract optimization, vendor risk. performance and compliance	• Director of Procurement • Product Development & Compliance Manager • Manager, Partnerships • Contract Specialist
Executive Leadership	Sets organizational strategy, governance and investment priorities. Oversees financial risk, compliance and cost controls	Financial sustainability and ROI. risk, compliance and governance, workforce productivity and retention, alignment with enterprise strategy, executive reporting and outcomes, audit readiness	• Chief Information Officer • Chief Communications Officer • CFO
Medical/Clinical Oversight Leadership	Provides clinical oversight for benefits, wellness, and care management programs.	Quality of care and clinical outcomes, evidence-based program design, population risk management, regulatory and clinical compliance, alignment with benefits strategy	• Chief Medical Director • Chief Wellness Officer • Chief Medical Officer
Program & Project Management	Manages the adoption and implementation of new vendors and programs	Ease of use, implementation and adoption.	• Senior Program Manager • Manager, Planning & Projects
